## WHITEBOARDS

# GO WITH THE WORKFLOW

Mobile solutions for  
flexible collaboration.

---

## **A WHITEBOARD THAT WORKS FOR YOU**

Whether you're using Nexus Tablets or Easels, one thing is for certain—creativity and collaboration will be taken to the next level.

The Nexus Collaboration Products are a great collection to tailor your communication needs. Go from on the wall to in your hands seamlessly. In the classroom or the office, the functionality of your workspace will shine.

# Meet Your Employees' Needs

Your employees embody a wide range of skills and working styles—that's what makes your company vibrant and versatile. Mobile whiteboards can empower them to find their best workflows.

Your employees are a neurodiverse group with differing work styles—and there's no one-size-fits-all solution for empowering them. When you create an environment that helps each employee tap into their strengths, everyone thrives.

- **Scale** – A single Nexus Easel in a quiet corner is perfect for one-on-one collaboration. Pull a few together, and you're ready for a robust team brainstorming session that considers all perspectives.
- **Separate** – Open floor plans enable fluid communication—but employees with sensory processing issues might find it hard to concentrate. Nexus Partitions move easily to create spaces for focused work.
- **Signal** – To accommodate a neurodiverse workforce, you need to communicate the function of each space. A whiteboard for huddle rooms and private workspaces makes it easy to see when the space is in use. Signs in common lounge areas can offer icebreakers or advertise events for your extroverted employees.

## Keep Messaging Consistent

In a manufacturing setting, line workers need to be kept informed of production schedules, safety measures, and training info. Nexus whiteboards can be positioned anywhere in your facility, from admin offices to the shop floor, to ensure clear, concise communication.

- **Customize** – Nexus whiteboards can be combined with a fabric bulletin board surface to make communication easy.
- **Coordinate** – Manufacturing involves many moving parts, and even minor miscommunications can reduce efficiency. Standardizing communication with mobile whiteboards can improve output and cultivate best practices.

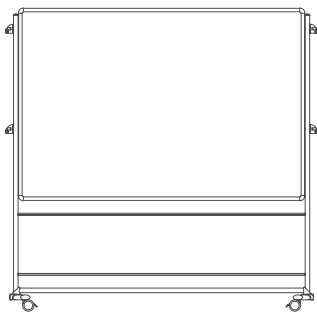

# Collaborate in the Classroom

Getting students involved with hands-on learning can excite them—and reach children with nontraditional learning styles. Nexus Easel+ can be paired with up to eight tablet whiteboards for flexible collaboration.

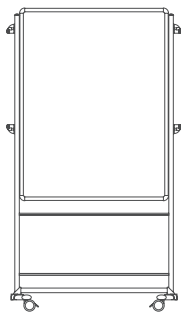

- **Versatile** – Hand the tablets out to students for small group work, or hang them from the central whiteboard for a larger surface area.
- **Long-lasting** – Our whiteboards resist scratching, ghosting, and staining, so they'll keep clean, even with regular classroom use.
- **Flexible** - Tablets are portable, providing opportunities for collaboration and learning outside the classroom.

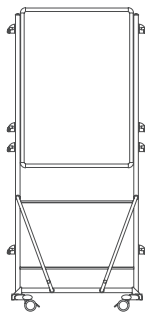

# Statement of Line

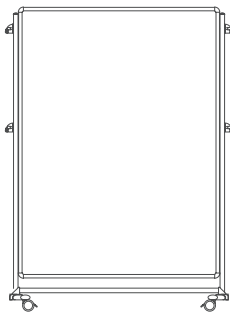

IdeaWall Easel  
76"H x 76"W

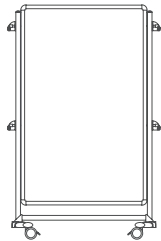

Easel  
75"H x 40"W

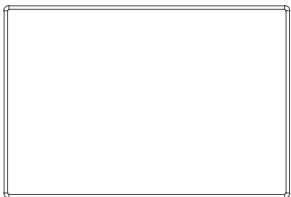

Easel+  
76"H x 32"W

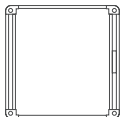

Partition  
76"H x 52"W

Jr. Partition  
57"H x 40"W

WallBoard  
3'H x 4'W or 4'H x 6'W

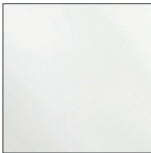

Tablet  
28"H x 28"W x 76"W

## Surface Finishes

Porcelain
