

# Phoenix World Class Vertical File Specifications

**Model LGL4W25**

## **Dimensions**

**Overall Cabinet: 54" H x 19 7/8" W x 25" D**

**Inside Drawer: 10 3/4" H x 15" W x 20" D**

**Weight: 471 lbs.**

## **Fire Resistance & Impact Rating**

The file carries the prestigious SP classification NT Fire 017 60 Paper which includes a one-hour fire test at 1700°F and a 2000°F explosion test. It has also been tested and certified for impact resistance during a 30' fall in compliance with KIS standards. The file's certification is considered equal to the UL Class 350 -1 Hr. Fire & Impact resistance classification.

## **MTC Grade B Rating**

This file now carries the prestigious MTC Grade B – 30 minute rating, certifying that certain types of less sensitive computer media (such as CDs, DVDs, USBs, flash drives, and memory sticks) can be safely stored inside.

## **Insulation**

Phoenix's proprietary insulation is asbestos-free, and uses modern age chemistry principles to provide outstanding fire protection. Insulation between each drawer makes each drawer a separate insulated container.

## **Inner Steel Jacket**

Insulation is fully encased between an inner and outer steel wall, keeping it out of contact with documents and out of the file suspension and locking mechanism.

## **File Body**

File body is made using .20 gauge steel using a uni-body construction style to provide an elegant look while maintaining structural strength.

## **Drawer Pulls**

Attractive, sturdy, recessed metal drawer pulls contain easy-to-read label holders.

## **Drawer Suspensions**

Phoenix uses a sturdy cradle suspension that is securely mounted to the file body.

## **Drawer Bodies**

Each drawer body has high sides for use with legal hanging folders. Movable dividers for manila folder filing are also included in each drawer.

## **Drawer Heads**

Drawer heads are made of welded steel and are insulated with our proprietary insulation. Each drawer head interlocks with the file body to make drawers resistant to heat transfer using a labyrinth sealing system. Special gaskets prevent water damage caused by fire hose spray or sprinklers.

## **Locks**

Phoenix files use a standard plunger lock that when engaged locks all drawers.

## **Lock Bypass**

Each file drawer is equipped with a lock bypass mechanism that enables the file user to allow a drawer to remain unlocked and accessible even when the file is locked.

## **Finish**

Phoenix World Class files are painted with an extremely durable water-based, air-dry, textured enamel paint finish.

## **Colors**

Phoenix World Class insulated files are available in black and putty colors.

## **Product Warranty**

All Phoenix files carry a three year parts and labor warranty.

## **Free After A Fire Replacement**

If your Phoenix fire file is exposed to a fire, Phoenix will replace the file free!
